Educational Qualification

Degree	Institution	CPI/%	Year
M.Tech	IIT Gandhinagar	8.71	2022 - 2024
B. Tech (CSE)	Sri Venkateswara University	8.68	2017 - 2021
Class XII	Sri Siddhartha Junior College(BIEAP)	98.8%	2015 – 2017
Class X	SPVB High School(BSEAP)	9.8	2014 - 2015

Experience

LLM – Python Engineer, Turing Enterprises Inc.

[Oct 2024 - Present]

- Trained and fine-tuned LLMs on 300+ tasks across Function Calling, CoT Reasoning, Agent Completion, Adversarial Self-Correction, and Structured Output, improving accuracy and robustness.
- Promoted to Team Lead, managing 10 engineers across SFT Agent Completion and Vision-FC projects; led prompt QA/reviews, consistently meeting daily targets of 20 and 50 tasks, respectively.
- Performed over 100 multilingual evaluations (Hindi/English) for an RLHF i18n project, improving LLM alignment with general-domain user queries.
- Developed Python-based test suites for a software engineering RLHF project, targeting GitHub repositories where models failed to generate correct test cases—automating validation and improving output reliability.

Teaching Assistant

[July 2022 - Jun 2024]

- Helped 450+ students in Python labs in understanding programming along with 20 other mentors.
- Assisted 160+ students with assignments, providing guidance on corrections in Databases course.
- Guided 20+ students in Verilog labs, earning praise for exceptional performance and adaptability.

Freelance tutor on CourseHero

[Jun 2021 - Jul 2022]

- Supported 250+ students with a 96% helpful rate, enhanced knowledge, and problem-solving skills of various computer science topics by engaging with a diverse student community.

Projects

A Gaze-Controlled Typing Interface with Context-Based Letter and Word Predictions

- Designed a multi-level tree-based virtual keyboard that supports disabled and speech-impaired people.
- Integrated statical letter prediction and word prediction models that help with quick and easy typing.
- Conducted experiments with Mouse and Eye-Tracker and compared the results with the Dasher software
- Obtained a typing speed of 30.70 and 18.47 letters per minute using the mouse and the eye tracker, respectively, which are nearly 2.7 times more than that of the Dasher with both input devices.

Helmet Detection and License Plate Extraction Using Yolov3 and Darknet

- Trained a real-time object detection algorithm - YOLOv3 model on 90% of the dataset of 4000 images using the Darknet Framework, achieving an impressive 87.49% average precision on a 10% test subset.
- Created a new dataset of 2800 carefully curated and manually labeled images using Labellmg software to achieve a remarkable 97.51% average precision on a 10% subset of the training data.

ML Projects: Airfoil self-noise Prediction, Breast Cancer Detection, Loan Prediction, etc.

- Executed ML projects by implementing some algorithms from scratch and evaluated their performance.
- Utilized appropriate models based on the project, resulting in valuable insights and practical experience.

Transformer Architectures for Natural Language Processing

- Engineered 6-layer Decoder and 4-layer Encoder-Decoder Transformers from the ground up in PyTorch to internalize granular architectural mechanics through NMT and next-character prediction applications.

Paper Publications

- Submitted Paper titled "Predictive Tree-based Virtual Keyboard for Improved Gaze Typing" to IEEE SMC2024.

Online Course Certifications

- 'Getting Started with AWS Machine Learning' by AWS Specialization.
- 'Data Science Math Skills' by Duke University.
- 'THE FUNDAMENTALS OF DIGITAL MARKETING certification' exam by GOOGLE DIGITAL UNLOCKED.
- 'Python for Everybody' by the University of Michigan.

Achievements

- Received PRATIBHA AWARD for Academic Excellence in the 10th standard issued by Govt. of AP.
- Secured 98.41 percentile (2,981 rank in 187484 students) in EAMCET 2017 (Govt. of AP).
- Attained 98.74 percentile (974 rank in 77257 students) in Graduate Aptitude Test in Engineering (GATE 2022).
- Solved 500+ questions and earned badges on platforms like HackerRank, CodingNinjas, and LeetCode.

Skill Summary

- Languages/Concepts: Python, C, C++, OOPs, SQL, HTML, LLM-assisted Development
- Tools/Libraries: NumPy, Pandas, Matplotlib, Git, GitHub, Django, Tkinter, Pytorch
- Courses: Data structures, Algorithms, Operating Systems, Databases, Machine Learning, Prompt Engineering
